Art Unit: 1631

The art unit designated for this application has changed. Applicant a are hereby informed that future correspondence should be directed to Art Unit 1631.

Applicant's arguments, filed 5/8/00, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention. In order to utilize the eligomers of structure VI they must be synthesized with at least some nucleobases therein for binding to nucleic acids for the hybridization use as instantly described. A thorough review of the instant specification including the numerous examples therein has failed to reveal any synthetic guidance for monomers of structure VI. Nucleotide monomer synthesis is well known in the art to proceed with detailed and complex protection and deprotection steps and are not enabled without at least one detailed description of how this this performed. Applicant argues firstly that the oligomeric compounds of the invention are

Art Whit: 1631

synthesized from monomers and that the monomer synthesis is therefore not required. In response the synthesis of the oligomeric compounds utilizing the elected structure VI is acknowledged as being instantly described. This is not the basis for the rejection. It is pointed out that in order to make a oligomeric compound of the invention the preparation or procurement of the monomers is first required. This preparation of monomer is lacking in enablement. Applicant argues that Example 77 on page 91 teaches the synthesis of a hydroxypiperidine compound from another starting material. This starting material is again not described as to how to make or obtain it and again supports this lack of enablement rejection based on a lack of enabling disclosure for making the invention.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.P. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 81

Art Unit: 1831 - 4 -Serial No. 08/973,381 November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 OFR § 1.6(d)). The CM1 Fax Center number is either .703: 336-4242 or (703)305-3014. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ardin Marschel, Ph.D., whose telephone number is (703) 308-3894. The examiner can normally be reached on Monday-Friday from 8 A.M. to 4 F.M. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, can be reached on (703) 308-4028. Any inquiry of a general nature or relating to the status of this application should be directed to the Technical Center receptionist whose telephone number is (703) 308-0196.
